

# AUTOMATED PRODUCTION CELL FOR PRESS BRAKE CUSTOMERS

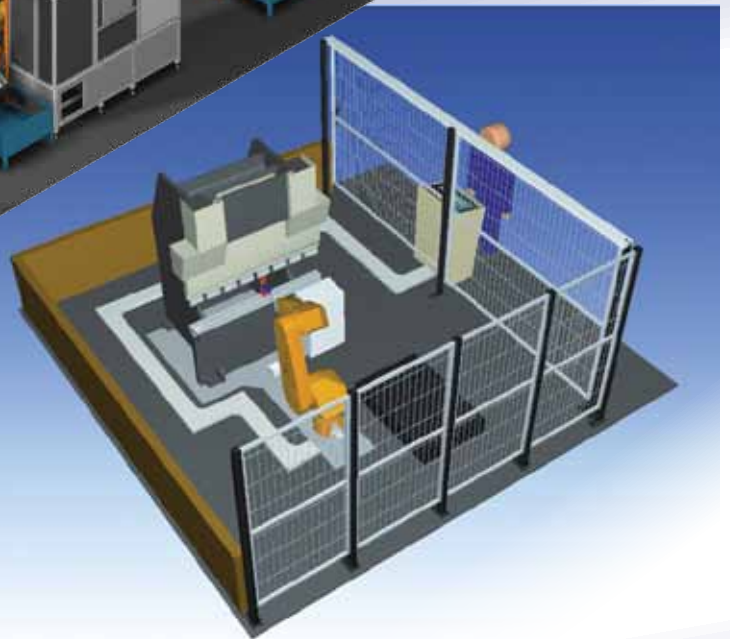

Haco Atlantic has partnered with Robosoft in an effort to provide an automated production cell for its Press Brake customers. Through our collaboration with Robosoft in designing this amazing software, we are now to produce a complete part at speeds of less than one minute.

This software combined with the NEW Haco Robotic cell will allow a cost effective automation solution for many of our Metal Manufacturers in the USA. This innovative product can show true cost savings even when running very small batches.

Contact us today to learn how we can bring you automation and lower costs to your shop floor!
